The **Directory of Rhode Island Manufacturers** is a listing of over 700 Rhode Island companies classified as manufacturers. For ease of publication, this directory lists only those firms with a total employment of 20 workers or more. The list is compiled from the RIEDC Company Database, an internal compilation of Rhode Island firms that is constructed using a voluntary mail survey of over 8,000 local employers. The directory includes name of firm, contact information, employment size, industry sub-group, and product description. The date on which the company last provided updated information is also shown.

Manufacturing firms are listed in alphabetical order within each sub sector of the new North American Industrial Classification System (NAICS). This classification has replaced the Standard Industrial System (SIC) used in the past. In some cases, there is no central Rhode Island location and in those instances an out of state business address is listed.
